HouseHunt – Project Demonstration Phase

1. Introduction

The project demonstration phase showcases the working functionality of the HouseHunt application. This phase demonstrates how users interact with the system and how the major features of the platform operate in a real scenario.

2. System Demonstration Flow

The following diagram shows the overall workflow of the HouseHunt system during demonstration.

3. Demonstration Steps

Step 1 – User opens the HouseHunt website.

Step 2 – User registers or logs into the system.

Step 3 – User browses available rental properties.

Step 4 – User views detailed information about a selected property.

Step 5 – User sends a booking request for the property.

Step 6 – Property owner reviews and manages booking requests.

Step 7 – Admin monitors system activity and manages users.

4. Screenshots

The following screenshots can be included to demonstrate the working interface of the application:

• Home Page

• Login Page

• Property Listing Page

• Property Details Page

• Owner Dashboard

• Admin Dashboard

5. Outcome

The demonstration confirms that the HouseHunt system successfully enables users to search rental properties, send booking requests, and manage property listings through an online platform.
